Introduction

Project Overview:

The CRM Application For Jewel Management is a sales force - based system designed to manage customer relationships, jewel inventory, sales, billing, and service requests. The system automates processes such as order tracking, customer communication, loyalty program management, and reminders for product maintenance.

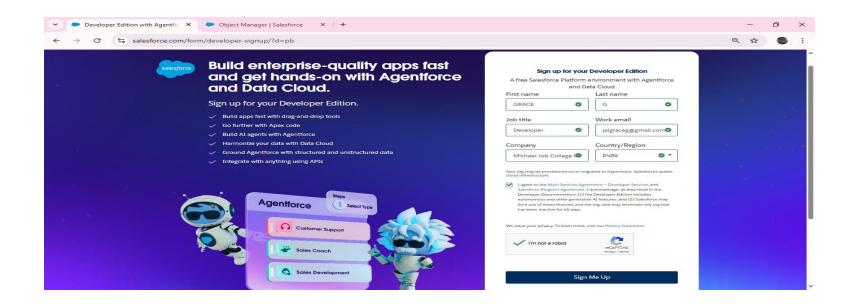

Purpose:

The main objective of this project is to enable jewel businesses to efficiently manage customers, sales, and jewel-related activities. It reduces manual errors, improves customer satisfaction, and ensures better business growth with sales force automation tools.

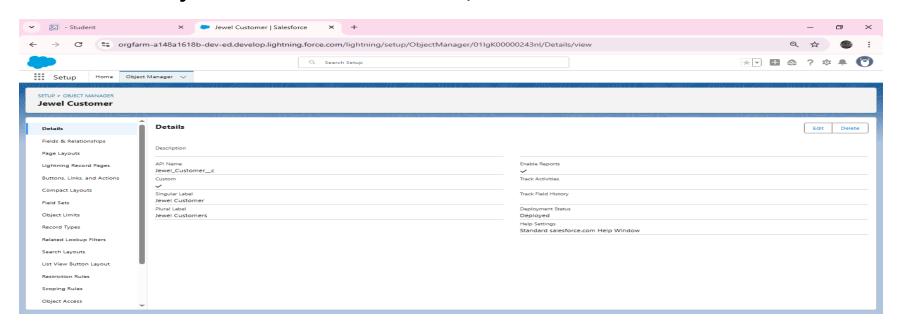

Development Phase:

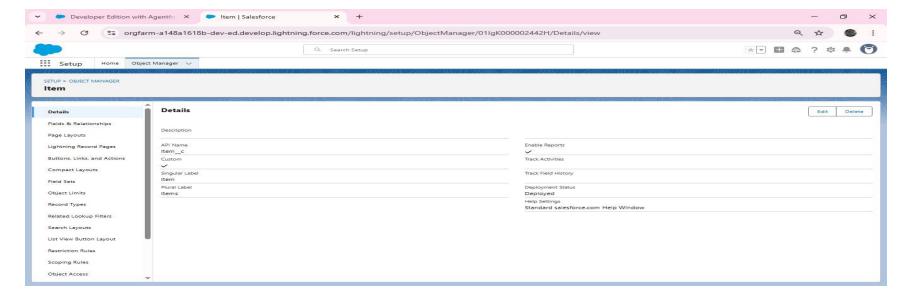

Create Developer Account By Using This URL:

https://developer.salesforce.com/signup

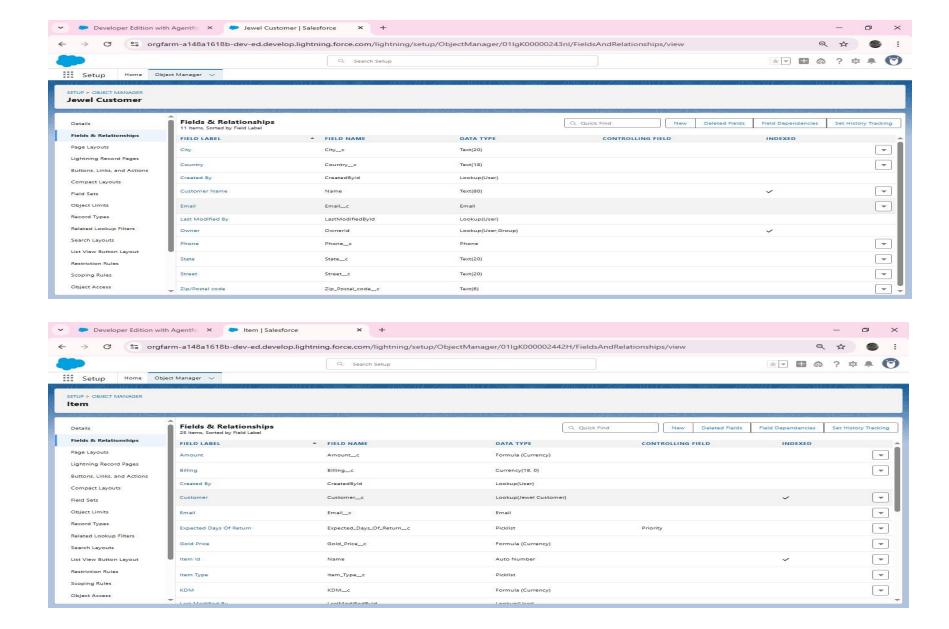

• Create Objects: Jewel Customer, Item

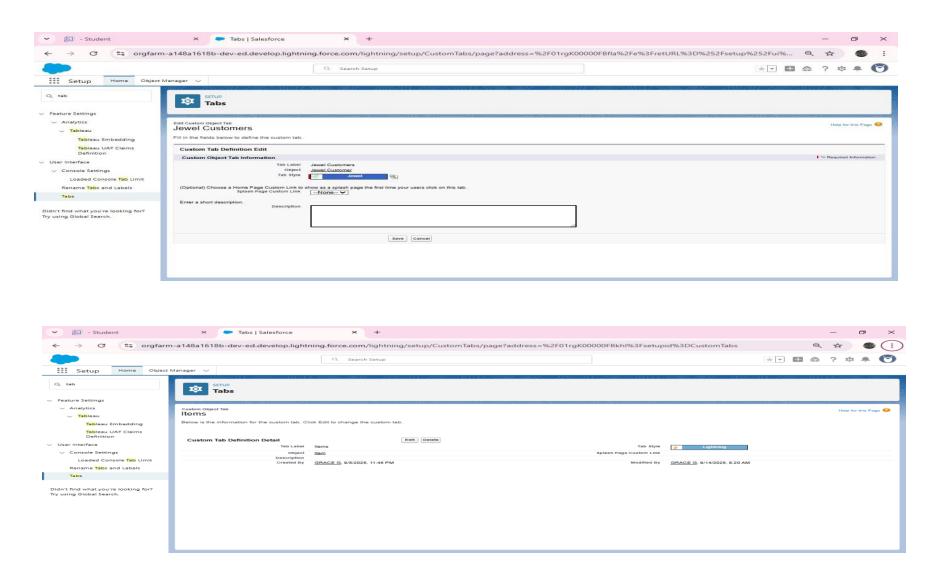

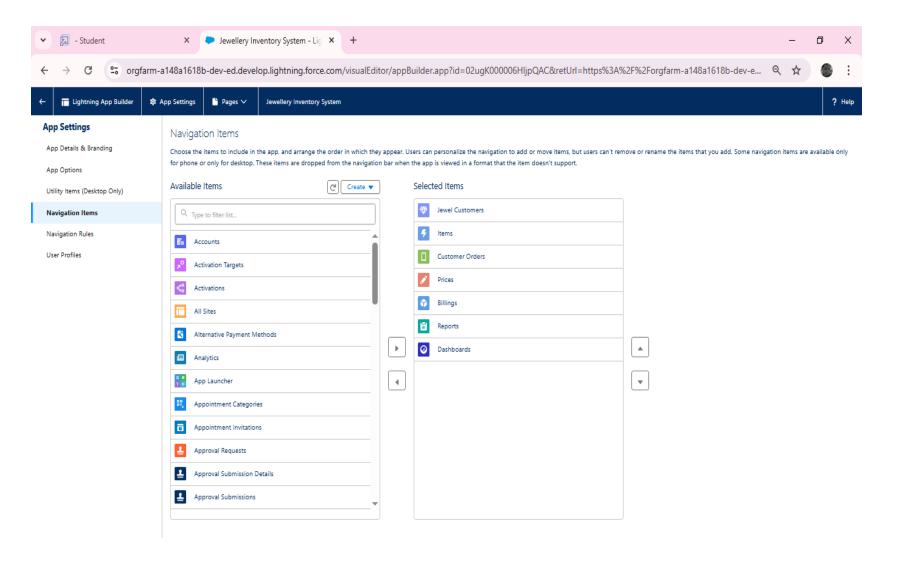

Configured fields and Relationships

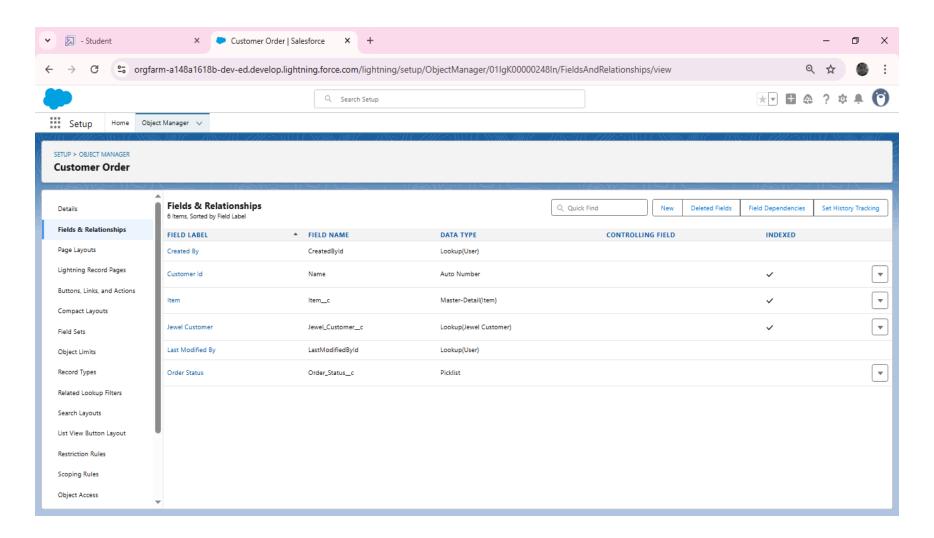

Developed Lightning App with Relevant Tabs

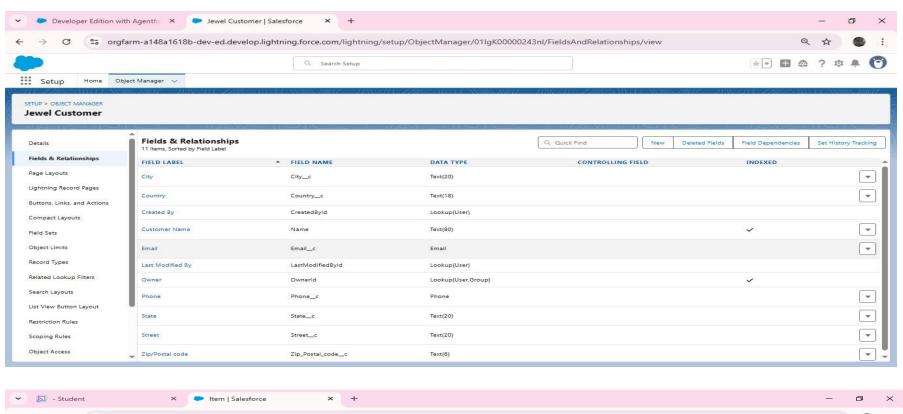

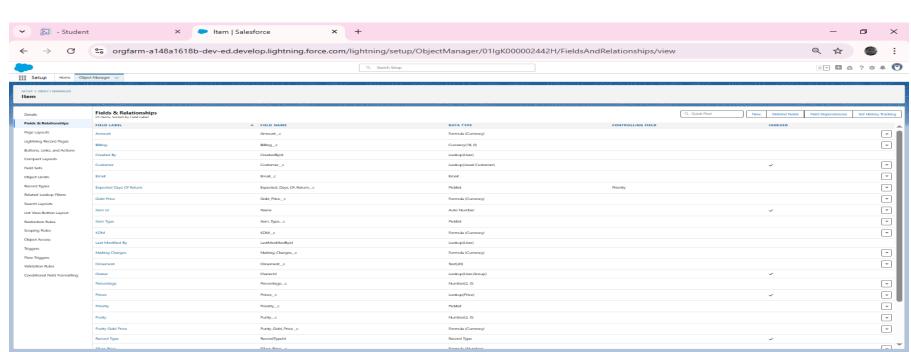

Create a Lightning App

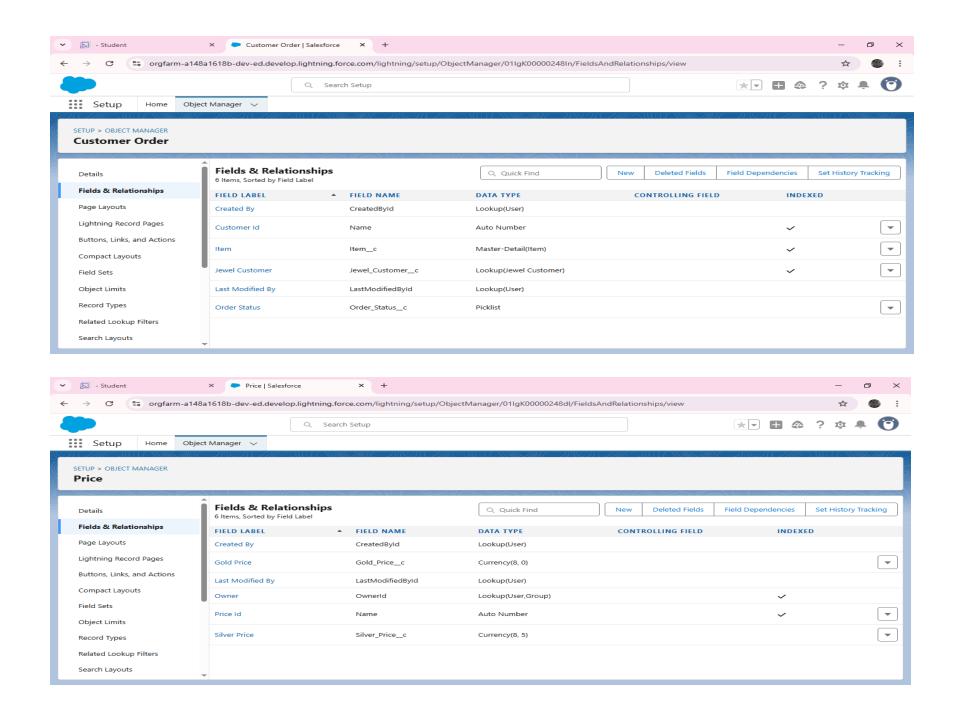

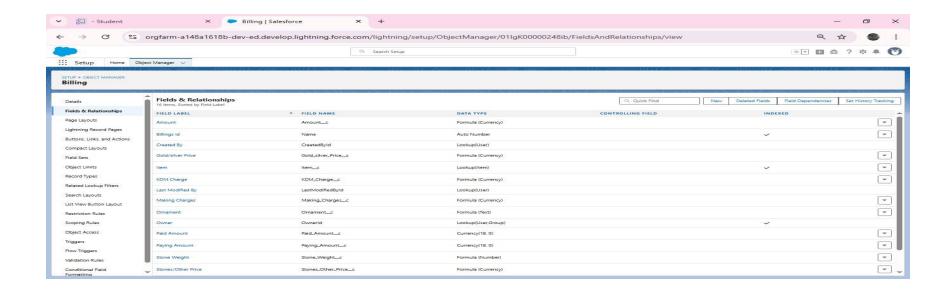

Create Relationships and Fields in Objects

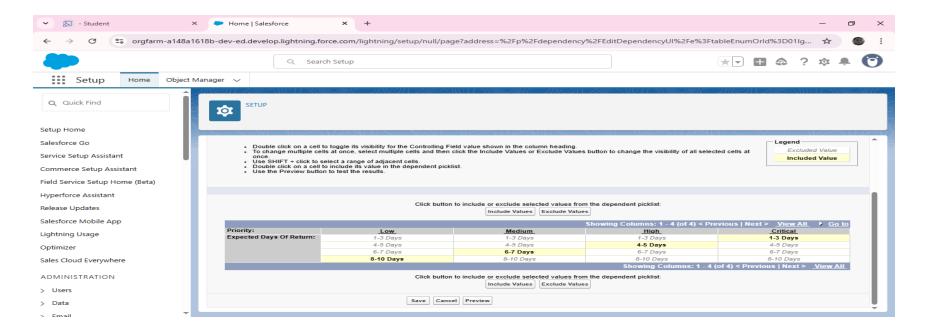

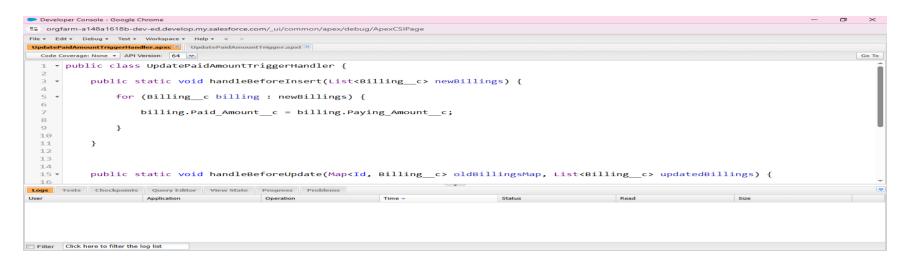

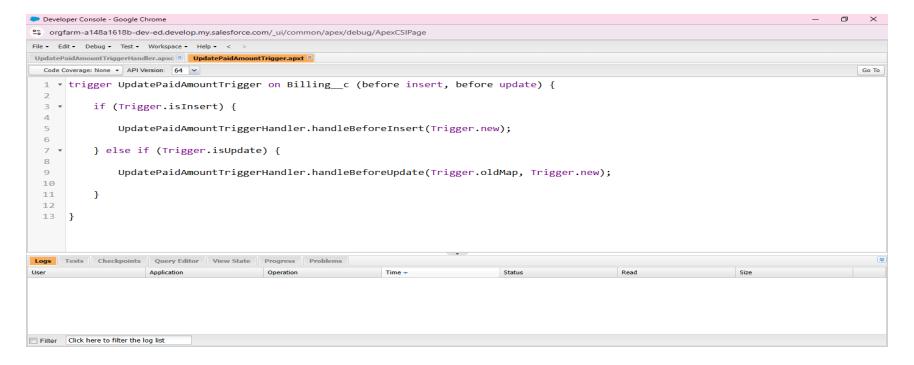

Create the Field Dependencies

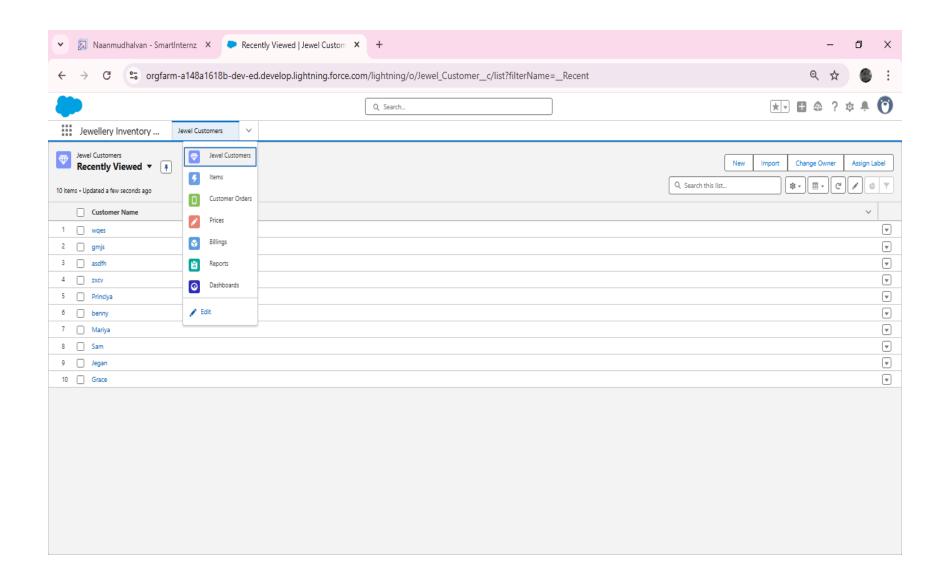

Creating a Trigger

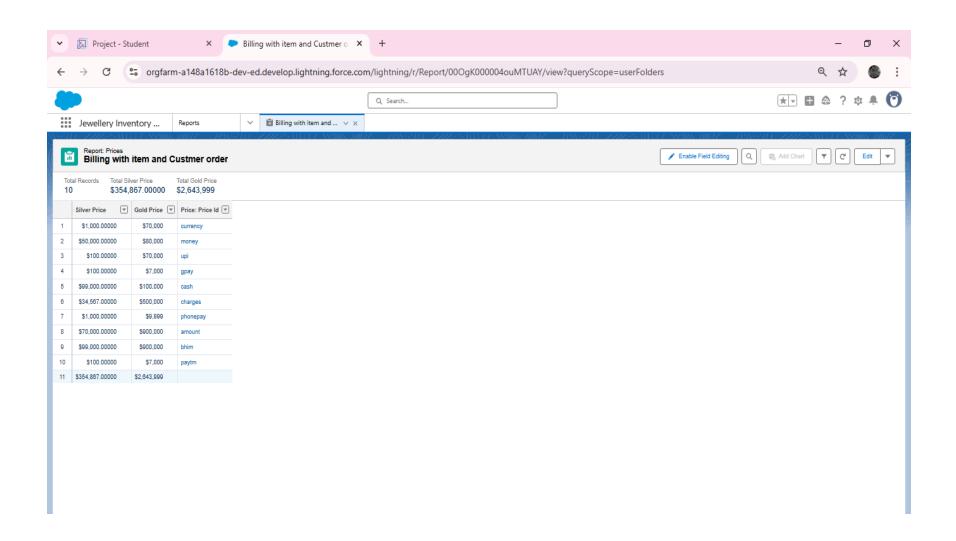

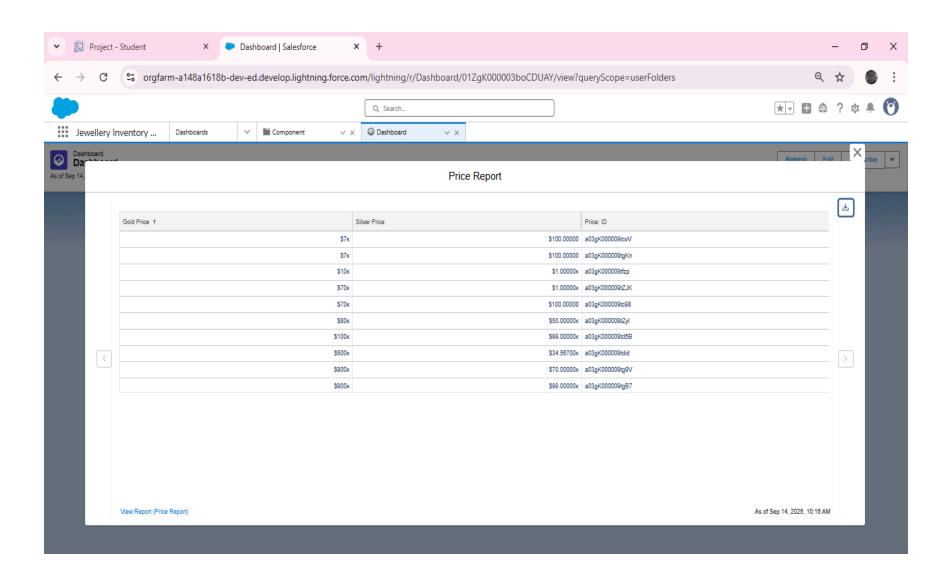

Create ,View ,Delete a Record in Jewel Customer

Create a Reports

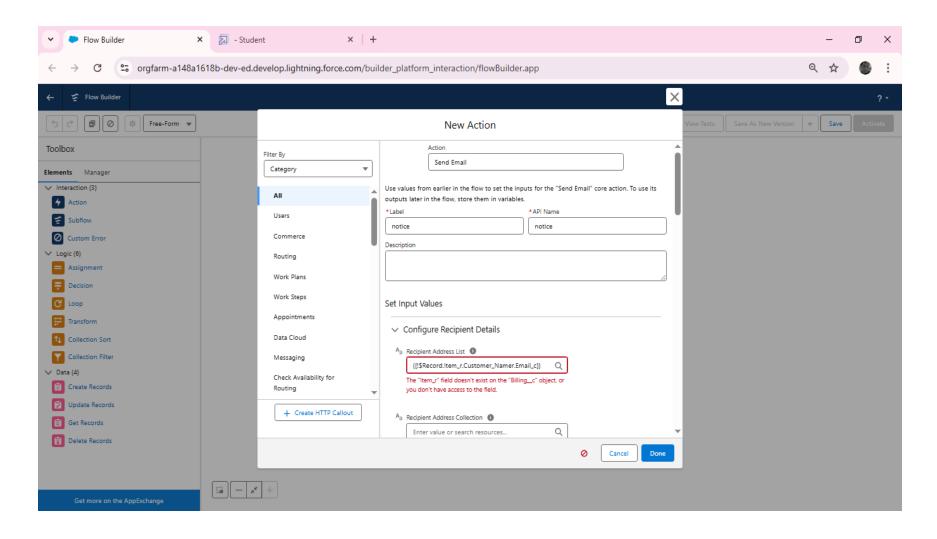

Create a Dashboard

Create a Flow

The flow label name is not given so you can't activate the flow, and the recipient address list formula is wrong so you can't move to the next step.

Conclusion

1.Update paid amount trigger handler

```
public class UpdatePaidAmountTriggerHandler {
  public static void handleBeforeInsert(List<Billing__c> newBillings) {
    for (Billing c billing: newBillings) {
      billing.Paid_Amount__c = billing.Paying_Amount__c;
  public static void handleBeforeUpdate(Map<Id, Billing__c> oldBillingsMap, List<Billing__c> updatedBillings) {
    for (Billing c billing: updatedBillings) {
      Billing__c oldBilling = oldBillingsMap.get(billing.ld);
      Decimal oldPaidAmount = oldBilling.Paid Amount c;
      billing.Paid Amount c = oldPaidAmount + billing.Paying Amount c;
```

2.Update Paid Amount Trigger

```
trigger UpdatePaidAmountTrigger on Billing__c (before insert, before update) {
    if (Trigger.isInsert) {
        UpdatePaidAmountTriggerHandler.handleBeforeInsert(Trigger.new);
    } else if (Trigger.isUpdate) {
        UpdatePaidAmountTriggerHandler.handleBeforeUpdate(Trigger.oldMap, Trigger.new);
    }
}
```
